Computer Science & Engineering: A Global Future

With San Diego State University, affordable education meets global opportunity. You can now earn a valuable Master’s in Computer Engineering from San Diego State University through an innovative new partnership between your university and SDSU Global Campus.

- 3 Semesters
- $27,330
- OPT Provided
- Scholarships Available

Career-focused Courses

- Database and Web Programming
- Machine Learning for Engineers
- Wireless Sensor Networks
- Embedded Operating Systems
- Advanced Object Oriented Programming
- Cybersecurity
- Neuromorphic Computing
- Artificial Intelligence and Reinforcement Learning
- Cyberphysical Systems
- Computer Networks
- VLSI

Project

Finish your program by completing a hands-on computer engineering project that will demonstrate your progress and proficiency.
