

Become a Public Health Leader with SDSU

San Diego State University's online Master of Public Health (MPH) in Health Promotion and Behavioral Science program was created by SDSU's School of Public Health — one of the top 25 Public Health programs in the country, according to U.S. News & World Report.

With a Master's in Health Promotion and Behavioral Science, you'll learn how to develop, implement, evaluate, and critique public health promotion programs. Developed exclusively for early career professionals, this online program gives you the opportunity to study on your own time without putting your public health career on hold.

Program Highlights

- Eight-week online courses
- Learn from expert faculty from SDSU's School of Public Health
- Earn your master's in as few as 20 months
- Participate in a supervised field placement experience with public health organizations in your own community
- Accredited by the Council on Education for Public Health (CEPH)

How to Apply

To successfully apply for the program, you'll need to hold a bachelor's/advanced degree from an accredited university, have an undergraduate 2.85+ GPA (3.0 for international students), and have completed an introductory statistics course. The department prefers that you demonstrate a minimum 3 years of full-time work experience in a public health-related position or organization.

We understand that every student's academic journey is unique, and we encourage you to contact one of our Student Service Representatives to find out what you'll need to successfully apply to the program.
