

## Become a Public Health Leader with SDSU

Learn what it takes to keep our communities safe by earning your Master of Public Health in Epidemiology from San Diego State University. This graduate program will help you acquire the public health knowledge and leadership skills you need to study and prevent disease, optimize health resource distribution networks, lead clinical trials, conduct sophisticated epidemiologic research, and more.

### Program Highlights

- Eight-week online courses
- Learn from expert faculty from SDSU's School of Public Health
- Earn your master's in just 2 years
- Gain hands-on experience in a supervised non-residential field practicum in your own community
- Accredited by the Council on Education for Public Health (CEPH)

### Estimated Cost

\$30,804 Includes Fees

### Min. Completion Time

22 Months

### Course Format

Online

### How to Apply

To successfully apply for the program, you'll need to hold a bachelor's/advanced degree from an accredited university, have an undergraduate 2.85+ GPA (3.0 for international students), and have completed an introductory statistics course. The department prefers that you demonstrate a minimum 3 years of full-time work experience in a public health-related position or organization.

We understand that every student's academic journey is unique, and we encourage you to contact one of our Student Service Representatives to find out what you'll need to successfully apply to the program.

**Please note:** we're offering this program online for the first time pending the approval of the Chancellor's Office. If you're interested in applying, please fill out an interest form, and we'll notify you as soon as applications are open.
