

Advanced Certificate in Web and Mobile Applications Development

SDSU's Web and Mobile App. Development Program Earn Your Certificate in Just Two Semesters

With mobile applications integrated into nearly every aspect of our lives, the industry grows daily, with no end in sight. Last year, mobile traffic accounted for 63% of total website traffic in the United States. And according to App Annie, revenues will reach \$101.1 billion by 2020.

You can be part of this high-demand, high-paying industry in as little as one academic year, with SDSU's graduate-level Advanced Certificate in Web and Mobile Applications Development program.

You'll complete a variety of sophisticated and challenging projects to acquire a deep understanding of the web environment. You'll also learn the science behind Android and iOS apps development — versus just the how-to — equipping you to handle constantly evolving technologies.

Program Highlights

- Tuition is less than \$5,000 — among the lowest in the U.S.
- Certificate can be completed in two 16-week semesters
- Courses may be applied to a master's degree
- Learn on campus at SDSU, online, or a blend of both (hybrid classes)
- Approved for federal financial aid through the SDSU financial aid office

Certificate Requirement

Complete at least four courses (12 units), selected with the approval of the program advisor.

Course Schedule

Three courses will be offered each fall and spring semester, so the certificate can be completed in as little as two semesters (one year). Check our website for course schedule details at neverstoplearning.net/mobile.

Fall 2020 | Apply by August 1

CS 545 Introduction to Web Application Development

CS 696 Multi-Platform Mobile Application Development
(New course)

CS 648 Modern Web Development Frameworks
(Online only)
